MAKE EVERY MINUTE COUNT

ENGINEERED PERFORMANCE

Experience tells us that time is the scarcest commodity on your farm.

To give you more time, we focus our energy on understanding the mechanics of your daily farm routines to engineer solutions that are in sync with your operations.

It started with Wilfred Giltrap making bespoke machinery from his Otorohanga shed in 1959. Building on his high standards, the shed has grown and so has our team's understanding of what it takes to build serious farm machinery. Together, we're building on Wilfred's legacy, obsessing over the details to design and manufacture robust equipment that is stronger and gets work done better and faster.

Our design process starts on the land, listening to farmers and growers. The things we hear and the insights we gather are then combined with generations of engineering experience and an understanding of what technology has to offer.

Through this process ideas are transformed into schematics and raw materials are engineered to create finished machinery built in our Otorohanga and Timaru facilities. You can rest assured knowing that we pride ourselves on our high quality manufacturing processes. We ensure each piece of kit lives up to the Giltrap reputation for strength, innovation and legendary durability. Any components not made in New Zealand are sourced globally from quality international suppliers.

It's all part of our promise, that as long as it's on your farm, a Giltrap machine will be in sync with your routine and make every minute count.

BALE FEEDERS

RELIABLE, EASY,
NO WASTE

We've designed our bale feeders to make feed time quick and easy. These finely tuned machines ensure that you have complete control over portion size and can quickly deliver round or square bales of hay or silage across all kinds of terrain, with no waste.

RS2 FEEDER

The Giltrap RS2 Feeder can efficiently feed out different variations of round and square bales. The RS2 is built to Giltrap's high standard for reliability and long-life performance.

G2X2 BALE FEEDER

Feeding a lot of bales doesn't have to take a long time. The G2X2 is quick to load and safe to use. Designed to feed out all types of round bales, including wrapped silage, hay and straw.

G2 ROUND BALE FEEDER

The G2 linkage-mounted feeder is designed to feed out all types of round bales, including silage and hay. The cradle design has a low centre of gravity and keeps the bale securely in the machine, making it great for working on and around hills.

BALE BUGGY

Don't have a tractor, or you don't want to tie up your big tractor feeding the stock? No problem. Our Bale Buggy will feed out all types of hay, straw or silage round bales - no tractor or hydraulics required!

G2 ROUND BALE FEEDER

BUILT TOUGH FEED ANYWHERE

With a low centre of gravity and robust build, the G2 round bale feeder is designed to feed out any round bale - and the odd square one, anytime, anywhere!

The stainless steel cradle means you won't waste any valuable loose feed and it has a low fence at each end to hold bales securely on steep hills.

You can connect the bale tine headstock from either end and feed in either direction saving you time and giving you total control of every bale.

KEY FEATURES & SPECIFICATIONS

HEAVY DUTY HEADSTOCK AND TINES

3-point linkage headstock with cradle drive and replaceable high-tensile hay tines, have one longer tine for reconnecting easily. Heavy profile plates carry the weight of the cradle/ bale without overloading the tines.

HEAVY-DUTY FEED BARS

6mm steel feed bars have aggressive tapered teeth to tear and release the tightest most difficult-to-feed bales. Each bar is bolted on for simple replacement if needed.

HI-TENSILE CAST SPROCKET

6-tooth cast sprockets with heavy duty motor dogs drive 3" high-tensile roller chains.

STAINLESS STEEL ADJUSTERS

External stainless steel adjusters make feed chain tensioning easy.

QUICK-RELEASE LATCH SYSTEM

Spring-loaded locking pin securely latches the headstock to the feeding cradle. Standard release latch is by rope or optional hydraulic latch.

HYDRAULIC MOTOR DRIVE

Hydraulic motor drive is mounted in the confines of the headstock out of harm's way.

DUAL DRIVE CONNECTION

There's a dog drive connection on both ends of the feeding cradle to speed up the loading process.

KEY FEATURES & SPECIFICATIONS

DUAL END LOAD AND FEED

The G2 can be loaded from both ends and can feed out in either direction. The feeding rate is operator controlled from the tractor for the desired feed row size. Full width stainless steel bed - retains valuable fodder and enhances durability and service life.

FULLY ENCLOSED DRIVE SHAFTS

Fully enclosed shafts - reduces wrapping and increases reliability and safety.

NO BALL BEARINGS

Both drive shafts run in greasable cast iron bushes which are impervious to dirt and moisture - ideal for a very long service life and low maintenance with just 4 grease points.

DIMENSIONS AND CAPACITIES

Overall length (m)	1.74	Feed chain (lb)	7500 3"roller
Overall height (m)	1.02	Hydraulics	1 x double-acting service
Overall width (m)	2.03	3-point linkage	Category 2 or 3
Weight (kg)	520	Fork tine type	2-1/4" high tensile

QUICK HITCH SEAMLESS CONNECTION

The Giltrap Quick Hitch helps you seamlessly connect to your towed implement in a way that won't compromise your load capacity or manoeuvrability.

The Giltrap Quick Hitch is robust and well designed to give you years of faultless service. The recessed tow pin closely mimics the position that a regular tow bar would be to maintain good stability of the towed implement.

DIMENSIONS AND CAPACITIES

Overall length (mm)	345
Overall width (mm)	1000
Overall height (mm)	846
Weight (kg)	76

KEY FEATURES

- Interchangeable Category 2 or 3 tow pin for trailers up to 18 tonnes
- Wearalloy plate where the towing eye rests
- Clear view to pin and latch from the tractor seat
- Spring loaded safety latch locks the tow eye into place
- 32mm centre bar for maximum strength
- Clevis-style linkage arm connections for long-lasting durability
- Fully powder coated for a durable finish

OPTIONAL EXTRAS

- Category 3 tow pin for trailers up to 18T

CLEVIS PIN CONNECTION

Clevis linkage pins mount the Quick Hitch securely and safely to the tractor and have long lasting durability. Designed with a clear view to pin and latch from the tractor seat.

INTERCHANGEABLE TOW PIN

Tow pin - can be Cat 2 (up to 12T) or Cat 3 (up to 18T). The towed implement tow eye rests on a wear resistant plate for increased life. A spring loaded safety latch locks the tow eye into place.

TIGHT TURNS

Smart design allows for tight turns, with a 32mm centre bar for maximum strength.

FROM SEED TO FEED

That’s the Giltrap Ag difference. From hard-working Giltrap machinery to help you feed, spread and carry to Duncan Drills, the world’s best drilling technology. We help take the hard work out of producing some of the world’s finest pasture and crops.

GLOBAL PRESENCE, LOCAL KNOWLEDGE

We put so much time and energy into bringing you the best possible products that we aren't going to let this stop when the equipment leaves our factory. With a dealer network around the globe we've made sure you'll get the best ongoing equipment support no matter where you are.

TO FIND YOUR LOCAL DEALER VISIT
GILTRAPAG.CO.NZ/OUR-DEALERS

We've assembled a comprehensive dealer network that knows what it takes to keep your Giltrap machinery in peak condition. With a blend of local knowledge and engineering expertise our team is here 24/7, so your business doesn't have to stop.

To find out more about our local dealer network or to discuss your specific needs, contact a member of our team.
